Education

University of Engineering and Management, Kolkata <i>Bachelor of Technology (Computer Science and Engineering)</i>	2022 – 2026 <i>CGPA : 8.68</i>
Kalyani University Experimental High School (H.S.) <i>HIGHER SECONDARY EDUCATION</i>	2020 – 2022 <i>Marks : 81%</i>

Experience

Cognizant <i>Intern – Java Full Stack With Angular</i>	Feb 2026 – Present
- Developed the Task Management module for a Smart City Infrastructure Management System, enabling assignment and tracking of maintenance tasks for public infrastructure workers. - Built RESTful APIs using Spring Boot and Spring Data JPA for task creation, assignment, status updates, and retrieval, and refactored the module into an independent microservice to improve modularity and scalability. - Developed the Angular frontend for the module and collaborated within a 5-member team to deliver end-to-end functionality, integrating frontend, backend, and database components.	

Projects

Natural Language to SQL Agent using Gemma	April 2026
Built an agentic AI system using Gemma (gemma4:e2b) that translates natural language queries into executable SQL by reasoning over database schemas stored in SQLite. Designed a multi-tool workflow with dedicated tools for schema inspection, SQL validation for complex query verification, and query execution, enabling reliable text-to-SQL generation and automated result retrieval.	
Financial News Sentiment Analysis using RoBERTa-Base	December 2025
Fine-tuned RoBERTa-Base on the Financial PhraseBank dataset for multi-class sentiment classification of financial news headlines by implementing tokenization, sequence length optimization, gradient accumulation, learning rate scheduling, model evaluation, and inference pipelines using PyTorch and Hugging Face Transformers, achieving 86.0% test accuracy, 0.856 macro F1-score, and 0.860 weighted F1-score.	
Brain Tumor Detection Using Convolutional Neural Networks Python, PyTorch, OpenCV, NumPy	November 2024
Developed a deep learning-based CNN-based brain tumor classification model using PyTorch on MRI images, implementing data preprocessing (OpenCV, NumPy) and augmentation techniques; optimized training with early stopping and achieved 95.7% validation accuracy with low loss, demonstrating strong generalization.	

Technical Skills

Languages: Python, Java, C, SQL
Data Analysis: Pandas, NumPy, Matplotlib, Seaborn
AI / LLM Engineering: PyTorch, Scikit-learn, Transformers, CNNs, Fine-Tuning
Agentic AI: Prompt Engineering, Tool Calling, Agent Workflows
Backend Development: Spring Boot, REST APIs, Microservices, MySQL, Spring Data JPA
Frontend Development: Angular, HTML, CSS, TypeScript, RxJS
Version Control: Git

Extracurricular

Ureckon <i>Coordinator and Volunteer</i>	March 2023 - Present <i>University of Engineering and Management, Kolkata</i>
Volunteered for 4 years at Ureckon, advancing to taskforce. Led a 50+ member team to organize 5 gaming tournament with 500+ participants, managing logistics, promotions, and registrations to boost event visibility and success.	

Achievements

- Achieved AIR 4637 in Graduate Aptitude Test in Engineering (CS/IT), 2026.
- Received the Vice Chancellor's Award for Best Overall Student Performance (2026) at University of Engineering and Management, Kolkata.
